PROFILE

MSc Artificial Intelligence student at Brunel University and Computer Science graduate. Currently developing Arivo AI - a full-stack AI platform addressing the visa and job market gap for international students in the UK. Experienced in shipping production-grade full-stack applications with microservices architecture, RAG systems, and ML pipelines. Seeking placement year as AI Engineer or ML Engineer.

WORK EXPERIENCE

Software Engineering Intern (Virtual) : JP Morgan Chase & Co. (Forage)

Jan - 2025

- Built and tested REST APIs in Java Spring Boot within a microservice-based financial system.
- Integrated Apache Kafka with H2 database for real-time event streaming - gained exposure to enterprise data pipeline patterns.
- Translated business requirements into working software modules, mirroring a consultancy-style delivery approach.

Full Stack Developer Intern: SNSIT LTD - London (On-site)

Mar - Jun 2024

- Contributed to the design and development of a fleet management system using Node.js, React, and MongoDB
- Implemented real-time features with WebSockets, enabling low-latency data communication
- Improved backend performance and collaborated in agile development cycles

KEY PROJECTS

Arivo AI – Full-Stack AI Career Platform for International Students (In Active Development)

React, Vite | Node.js, Express | Python, FastAPI, LangChain | Groq API | MongoDB, ChromaDB | Docker, AWS

- Engineered RAG pipeline with semantic job search, ML skill gap analyzer (scikit-learn), and persistent chat memory - Phase 4 of 6 complete.
- Built production-ready microservices: React frontend with dark mode, Node.js backend with JWT auth, FastAPI AI service with LLM + ML endpoints.
- Coming: PDF CV parsing, real-time job APIs (Adzuna, Reed), visa-intelligent filtering, AWS deployment with CI/CD

GlobeTalk – Real-Time Multilingual Chat Application

- Built MERN stack chat system with concurrent user support and real-time translation across multiple languages.
- Optimized WebSocket communication for low-latency messaging.

EDUCATION

MSc in Artificial Intelligence - Brunel University London, (Expected 2027, Placement Year)

- Modules:** Machine Learning, Deep Learning, Cloud-Based AI Systems, Generative AI, Natural Language Processing, Data Science.

BSc (Hons) Computer Science - Middlesex University London, Graduated 2025

- Modules: Python, Java, AI/ML, Data Visualization, Advanced Web Applications, Database Management Systems, Algorithms & Data structures.

TECHNICAL SKILLS

Programming Languages: Python (Primary), Java (Secondary), JavaScript, SQL, TypeScript.

Cloud Platforms: Google Cloud (Translation API, fundamentals), AWS (Cloud Practitioner - In Progress, AWS Educate Badges: Compute, Storage, Networking, Databases).

AI / Generative AI / ML: RAG systems, LLMs (Groq API), LangChain, ChromaDB, scikit-learn, HuggingFace embeddings, semantic search, Deep Learning.

Data Engineering & Analysis: Pandas, NumPy, Jupyter Notebook, Exploratory Data Analysis (EDA), Data Cleaning, Apache Kafka.

Data Visualization: Tableau, Microsoft Power BI, Matplotlib, Plotly.

Web & Backend: FastAPI, Node.js, React, REST APIs, Docker, Git, CI/CD.

Databases: MySQL, PostgreSQL, MongoDB, BigQuery (Familiar).

CERTIFICATION & ADDITIONAL INFORMATION

Certifications: AWS Cloud Practitioner (In Progress) · AWS Educate Badges · Stanford Machine Learning Specialization · IBM AI Fundamentals · McKinsey Forward (2025)

Languages: English, Hindi, Gujarati (Fluent) · French (Elementary)

Presentations & Communication: Regular presenter during BSc projects and NGO community initiatives - confident communicating technical work to non-technical audiences.

Availability: Full right to work in the UK · Available June – October 2026 for summer internship.
